SUMMARY

- **Data Analysis and Statistics**: Clean, structure and analyse data with Python (pandas), SQL and Excel; apply hypothesis testing and correlation analysis, including t-tests and Spearman correlation on VR performance data from 60 participants.
- **Reporting and Dashboards**: Build and use Power BI and Excel dashboards (Power Query, Pivot Tables) that track KPIs such as sales, attendance, engagement and retention for non-technical stakeholders.
- **Requirements and Stakeholder Engagement**: Gather and balance needs across customers, members, university management and committees; translate them into scope, plans and process maps (BPMN, Visio, Lucidchart).
- **CRM and Customer Data**: Two years of hands-on Salesforce CRM use across telco retail and member engagement, including cleansing 500+ member records.

PROFESSIONAL EXPERIENCE

Telstra (Canberra) – Retail Consultant — Oct 2025 - Present

Customer-facing sales and service role across mobile, internet and device products.

- **Customer Needs Analysis:** Serve 20 to 30 customers per shift, using Salesforce CRM to review account history, log interactions and match plans, devices and bundles to each customer's usage.
- **Reporting and Dashboards:** Track 5+ store and personal KPIs (sales, cross-sell, device attach and customer satisfaction) in Power BI dashboards, using the trends to target cross-sell opportunities and lifting my average transaction value by about 15%.
- **Technical Troubleshooting:** Resolve connectivity, device and account issues through structured diagnostic checks, cutting repeat visits for the same issue by about 20%.

Engineers Australia, ACT Division (Canberra) – Member Engagement Associate — Jul 2025 - Apr 2026

National professional body for engineers; the ACT Division runs events and engagement programs for local members.

- **Engagement Data:** Analysed Salesforce CRM engagement data for 200+ members across 15+ events, guiding outreach that contributed to a 12%-18% increase in event attendance.
- **Dashboards:** Built 3 Excel dashboards (Power Query, Pivot Tables) tracking attendance, email open rates and retention, cutting manual reporting time by about 35%.
- **Data Quality:** Cleansed and standardised 500+ member records, reducing duplicate and inconsistent entries by 25%-30%.

UniLodge (Canberra) – Residential Advisor — Dec 2024 - Jan 2026

Purpose-built student accommodation provider.

- **Resident Support:** First point of contact for 500+ residents, handling queries and incidents and running 10+ community events.
- **Records Management:** Maintained and updated 500+ resident records, keeping information accurate for staff and audits.
- **First-Line IT Support:** Resolved about 85% of network access and resident portal issues without escalation.

RESEARCH EXPERIENCE

University of Canberra – Technical Research Assistant (Volunteer) — Feb 2025 - Jun 2025

Research using the Virtual Human Benchmark, a VR reaction game built by UC researchers, to measure reaction times in people with dementia.

- **Data Collection:** Gathered and consolidated research data from multiple sources, then cleaned and structured it for analysis.
- **Prediction and Statistical Analysis:** Ran prediction and statistical models on reaction time data under the research lead's guidance, documenting how each model worked and where it fell short.
- **Literature Review:** Reviewed research on dementia, reaction time and VR-based assessment to inform the study's direction.
- **Equipment and Documentation:** Maintained the study's VR hardware and documented data sources, methods and changes.

PROJECT EXPERIENCE

NSW Electricity Market Price and Demand Analysis – Personal Project — Oct 2026 - Present

End-to-end analysis of two years of 5-minute AEMO wholesale price and demand data for NSW (including the ACT), joined with hourly weather data.

- **Data Pipeline:** Built a Python pipeline that downloads 24 months of AEMO and weather data, runs quality checks and loads 200,000+ intervals into SQLite.
- **SQL Analysis:** Wrote SQL with CTEs and window functions to profile prices by month and hour, detect price spikes and negative prices, and measure demand against temperature.

- **Key Findings:** Found that the most expensive 1% of 5-minute intervals drove 24% of total wholesale cost, and that 10% of intervals had negative prices, rising to 28% at weekday midday; presented results in an interactive dashboard and a one-page brief.

VR Reaction Time and Performance Analysis – Master's Capstone — Jul 2025 - Nov 2025

Team of five evaluating the Virtual Human Benchmark, a VR reaction game built by UC researchers, for healthcare and rehabilitation use.

- **Data:** Analysed heart rate, reaction time and accuracy across two postures and two game modes, expanding the dataset from 25 to 60 participants.
- **Statistical Testing:** Used t-tests to show standing significantly raised heart rate (about 10 BPM) and slowed reaction time (4.1s vs 2.9s), and used Spearman correlation for the skewed accuracy data.
- **Findings:** Sequence mode slowed responses two to three times compared with Accumulator mode; posture and task complexity mattered more than handedness.

MyWay+ Smart Transport App: Project Plan – University of Canberra — Mar 2025 - Apr 2025

Team of three planning an upgrade to Canberra's public transport app with real-time tracking, AR navigation and eco-rewards.

- **Research and Requirements:** Led research and requirements gathering, identifying gaps in the current app and stakeholders including Transport Canberra, tourism bodies and commuters.
- **Scope, Schedule and Cost:** Built a 36-activity WBS across five Agile phases, a 113-day schedule using PERT and Critical Path Method, and a bottom-up budget of AUD 173,073 across 19 roles.
- **Value and Risk:** Set SMART targets (10,000+ downloads, 25% fewer support queries, 99.5% uptime) and built a risk register with RACI ownership and a change control process.

EDUCATION

University of Canberra, Master of Business Informatics — Feb 2024 - Nov 2025

Honour: Dean's Excellence Award, Semesters 1 and 3 (GPA above 6.5/7)

Symbiosis International University, Bachelor of Business Administration and IT — Jul 2020 - Apr 2023

LEADERSHIP AND VOLUNTEERING

UC Stars Running Club, University of Canberra – Co-founder and Vice President — Jul 2024 - Nov 2025

- **Club Growth:** Co-founded the club with two peers and grew membership from 20 to 60+ in three semesters; it now has 120+ members and is one of UC's largest clubs.
- **Partnerships:** Co-negotiated the first brand partnership with LSKD for member discounts; the club has since added New Balance and Elite Supplements.
- **Operations and Stakeholders:** Managed finances, budget and university compliance, met with UC management, and balanced the needs of runners, the University and the committee to shape twice-weekly runs and perks.
- **Outreach:** Set up the club's Instagram (750+ followers, one of UC's most followed clubs) and recruited members at Market Day.

SKILLS

- **Data and Analytics:** Python (pandas), SQL, SQLite, Excel (Power Query, Pivot Tables), Power BI, statistical testing
- **Business Analysis:** Requirements gathering, stakeholder engagement, BPMN, Visio, Lucidchart, WBS, PERT, CPM, Microsoft Project, risk management
- **Systems:** Salesforce CRM, Git, GitHub, Microsoft 365
